

NEW FRONTIERS

Cellular Therapy: Advances in Stem Cell Transplant and CAR-T

Join us for a conversation with Dr. Kylie Lepic, a malignant hematologist at the Juravinski Cancer Centre and Associate Professor at McMaster University, as we explore recent advances in cellular therapy for blood cancers. Dr. Lepic will discuss what's new in stem cell transplantation and CAR-T therapy, how these treatments work, and what they may mean for patients and families. This session will help participants better understand evolving treatment options and the hope they bring for the future.

Date

TUE, FEB 10
